AAAS Statement on White House Proclamation on Immigration and Visas

The Trump administration's actions on immigration and visas – most recently the September 24 White House proclamation -- continue to have a chilling effect on students and scientists who seek to work and collaborate with their peers in the United States. Scientific progress depends on openness, transparency and the free flow of ideas. The United States has historically benefited from its attraction of international scientific talent, which is essential to U.S. economic and national security. We remain concerned that administration policies are trading the loss of scientists and future scientists to our country for unsubstantiated improvements to security. Impacts to U.S. leadership in science, technology, and innovation must be considered in the development of immigration and visa policy.

-- Rush Holt, chief executive officer, American Association for the Advancement of Science (AAAS)

#

The American Association for the Advancement of Science (AAAS) is the world's largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to "advance science and serve society" through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
